

Our **NHS**

Let's take care of it!

If your regular medicines were part of the household's weekly shop, what would you choose?

Sometimes only a branded item will do. There are other times when it doesn't make any difference!

By only using branded items when needed the local NHS could save **£150,000 per year.**

There are conditions when only a brand name product should be prescribed.

But, many conditions don't require a branded product because the alternative, **known as a generic**, provides exactly the same benefit.
