

Yorkshire Health Solutions Community Ultrasound Service

YHS offers an ultrasound service for NHS patients available at or near your practice. This service is commissioned and funded by your local CCG to provide increased patient choice and access to diagnostic tests closer to home.

Our expert sonographers perform scans with supervision and specialist advice from NHS consultant radiologists in our team. We provide an accessible, local service and ensure **results and images can be available to a hospital specialist** if necessary.

We aim to perform all non-obstetric ultrasound scans within 2 weeks of receipt of referral and run at national tariff, so there is no extra cost to NHS. All reports are back with the practice within 3 working days.

Procedures Performed	Exclusions
<ul style="list-style-type: none"> • Abdomen • Renal tract • Pelvis • Neck • Shoulder • Achilles • Wrist • Tendons/Ligaments • Lumps and Bumps • Groin/Hernia • Biliary Tree • Pancreas • Fingers/Toes 	<ul style="list-style-type: none"> • Testes • Hip • Ankle • Knee • Elbow • Foot <ul style="list-style-type: none"> • Cancer - suspected cancer should be referred through the 2WW referral pathway. • Breast and axilla • Cardiac imaging (other than aorta) • Chest • Ophthalmology • Thyroid • Children under 18 • Submandibular gland • Obstetrics care • Echocardiogram • Non NHS patients • Ultrasound guided procedures • Housebound or requiring patient transport
