

HEE Funded GPN Education/CPD for Y&H

INTRODUCTION

This document is the companion document to the 'Induction and Education support for new GPNs'. It provides the current list of HEE commissioned/funded education and training available within Yorkshire and the Humber region.

Ideally employers should devise an induction and education plan for each new GPN which identifies their learning needs for up to 18-24 months into their new role. This plan can be devised by utilising the companion document mentioned above.

Please note the following relating to this document and the companion document;

Initial practice led induction and education is supported by both in-house and E-Learning for Health provision - these are listed separately on the 1st tab. ELfH resources are free to use for health and social care staff (upon free sign-up).

New GPNs will require most (if not all) CORE education topics, some will also require SUPPLEMENTAL education topics. Later during their Educational journeys, GPNs may choose to undertake further education to EITHER gain a SPECIALISM such as diabetes or LTC or to become an ADVANCED CLINICAL PRACTITIONER (which is a more generic role which involves formal accredited study as opposed to length of service per se).

In deciding which courses may be appropriate for a new GPN, employers will need to weigh up the benefits of attendance at a study day versus a longer potentially accredited course - this will depend on the new GPNs role within the practice/employer preference/new GPN preference amongst other things.

Other provision may also be available at cost and may be provided in a more time focused manner and/or better suited to your needs.

The accuracy of this document was checked Jul17 so please advise if you find any changes/errors/omissions.
