

Extension for Community Healthcare Outcomes

Scarborough, Ryedale and Vale of York

Accessible learning

Project ECHO provides a model of education that offers knowledge sharing amongst health care professionals, currently operating in over 35 countries.

ECHO creates accessible learning opportunities with the aim of bringing care staff together to create a community of practice from across the care sector, regardless of role or location.

Moving knowledge not people

Interactive video conferencing features case based learning which aims to develop knowledge, confidence and skills to provide the best care possible.

With Project ECHO we can learn from, teach and support one another to improve people's care.

How will Project ECHO help you

- ECHO can offer free Continued Professional Development at any location with internet access
- Training topics agreed by participants in advance to meet staff need
- Increased confidence, competence and consistency in care delivery
- Local care providers feel connected through increased peer support
- Improved access to services can assist in reducing unmet need
