WELCOME

Hello and welcome,

It goes without saying that the pandemic response for Covid-19 has highlighted the need for organisations the length and breadth of the country to elevate attention to the control and prevention of infection.

From schools, factories and offices to hospitals, care homes and shops, it has never been more important to proactively manage and control infection in the workplace to help reassure staff, customers, patients, and loved ones. Ongoing assurance is key. We are an expert partner that has NHS credentials and experience. We can help you create and/or support the environmental management plan for your premises, as well as re-train your existing cleaning staff. We can also be at the end of the phone should an outbreak occur or a question arise.

Our services are delivered to the same level of standards, verification and ethos as those adopted within the NHS. We are an NHS owned company, social responsibility is in our DNA, which means we provide value for money and any profits are reinvested into the NHS. What's more, in a time of national need strong community partnerships are key and partnering with us enables reinvestment into front line patient care.

If you agree, we'd love to hear from you.

Mike Worden
Managing Director at NTH Solutions

ABOUT US

NTH Solutions is a wholly owned subsidiary of the NHS. We launched the Infection Control Deep Cleaning and Advisory Service to help communities respond to the Covid-19 pandemic, following our own successful management of the pandemic in an acute healthcare Trust.

The wider company delivers a full suite of estates and facilities services to North Tees and Hartlepool NHS Foundation Trust. In addition, and without compromising the service delivered to the Trust, we offer that same suite of services to the surrounding communities, the income from which is reinvested into front line patient care.

Discover more about us, including our full range of services, at www.nthsolutions.co.uk or give us a call on 01642 383759.

OUR VALUES

SUPPORT

We support each other in life and work

EXCELLENCE

We take pride in our work and strive to exceed expectations

CUSTOMER LED

Our services are shaped around your needs

SAFETY

Safety is at the heart of every decision we make

SERVICES, PACKAGES AND RESOURCES

Although we believe that an ongoing partnership is the best way forward we understand that you may want to try out the services first so we have developed a One-off Response Package, in addition to our Partnership Reassurance Package:

Partnership Reassurance Package

- Initial consultation including audits and risk assessment
- Bespoke environmental management plan, recommending how to prevent and control infection – specific to your premises
- Reassurance drop-in sessions for your staff and other site users
- Training for your cleaning staff to improve standards and follow up audits to ensure they are maintained
- Deep-cleaning and bio-decontamination including all appropriate materials, machinery, PPE and official certification
- Advisory support line for everything from cleaning techniques to compliant cleaning products, furniture and furnishings
- Outbreak response team should an outbreak occur
- Single point of contact/key account manager

One-off Response Package

- Initial consultation including site audit and risk assessment
- Bespoke environmental management plan, recommending how to prevent and control infection – specific to your premises
- Deep-cleaning and bio-decontamination including all appropriate materials, machinery, PPE and official certification
- Single point of contact/key account manager

Bespoke Packages

We understand that sometimes you may need a completely bespoke solution. With more than 700 staff trained to NHS standards and a full suite of estates and facilities services we can create completely bespoke solutions to meet your needs.

THE DIFFERENCE

Our Infection Control and Deep Cleaning Advisory Service is completely unique, with a particular emphasis on partnership working:

Same level of standards and verification as those adopted within the NHS

Official deep cleaning and bio-decontamination certification

A unique advisory element including training your own cleaning staff

DBS checked, skilled professionals including Deep Cleaning Technicians and Supervisors

Dual verification including on-site quality control audits and microbiological swabbing (ATP testing)

Supporting the NHS and enabling reinvestment into frontline patient care

“

When I heard that the team from NTH Solutions were offering this type of service, it was a moral no-brainer to choose them over others now flooding the market.

”

Karl Pemberton
Managing Director,
Active Financial Planners

TECHNOLOGY AND APPLICATIONS

Hypochlorous Disinfection	Cleans, decontaminates and disinfects all current pathogens and micro-organisms in buildings and their contents using a non-toxic solution
Thermal Chemical Disinfection	Decontaminates textiles without damaging them
Sterile Services Department	Sterilises reusable medical instruments and high level disinfection
The Vapoquip	Decontaminates equipment and furniture using vaporised hydrogen peroxide
Steam Cleaning	Removes stubborn marks and heavy soiling on equipment and furniture
Touch Point Cleaning	Cleans common touch points of a building

Standards and verification

Of course we carry out Adenosine Triphosphate (ATP) swab testing to verify effectiveness but it would be impossible and impractical to swab every inch of a surface. So we go a step further. Expert Quality Control Advisors will conduct on-site quality control audits in line with National Standards of Healthcare Cleanliness.

FAQS

We're asked a lot of questions – here's the top 3

1 How much does it cost?

Generally, our packages start from £495. To ensure value for money, we will undertake a site visit to assess the size and type of your premises, and to gain an understanding of your requirements so we can provide you with a quote.

2 How long will it last?

It's a myth that any form of bio-decontamination will last for a specific amount of time or that it can be effective without prior deep cleaning. It's about improving your standards and maintaining them, which is why we advocate partnership working.

3 I already have cleaning staff – can you work with them?

Yes, we're happy to supplement and/or train your existing cleaning staff or suppliers. This is about working together to enhance and maintain your environments to control and prevent the spread of infection.

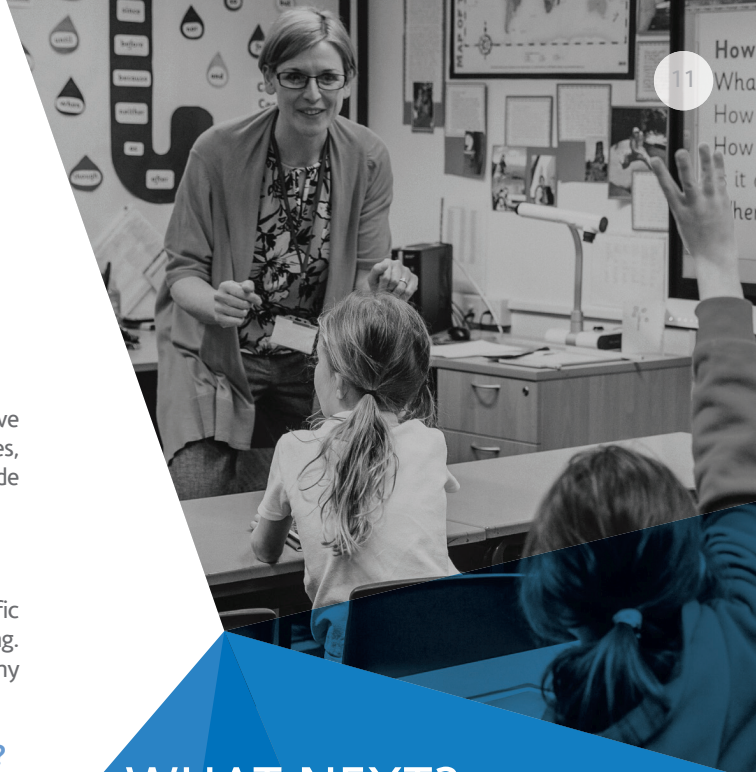

WHAT NEXT?

If you'd like to know more we'd love to hear from you. We'd be happy to chat over the phone, video conference or come and do a site visit so we can provide you with a quote.
