## Practice Nurse Engagement

### What's in your Practice Nurse Engagement Bulletin?

This weekly bulletin provides details of training, guidance, access to past editions and lots more. There's also helpful information on the web pages dedicated to our practice nursing colleagues. [Please click here to bookmark these pages.](#)

### Merry Christmas to all our Practice Nurses and HCA's

As we get to this time of year – we always look for a well-deserved break, fun times with our loved ones and reflect back on what has happened during the year.

Well, it's hard to believe what everyone has been through, and none more so than our Practice Nurses. You have needed to adapt quickly, keep up to date with endless national updates and changes, prioritise a list of never ending priorities, keep yourselves and your patient safe, roll out the biggest flu vaccination program

ever and to top it off – roll out Covid vaccination! And always maintaining compassion and kindness central.

So please ahead of what may be a short and different Christmas break – take a deep breath (or two!), give yourself the biggest hug and congratulate yourself on what you have achieved. We at VoY CCG are in awe of what you have done. And whilst this isn't over, things do look brighter ...but for now at least enjoy your break and smother yourself with a little self-care.

Take care of yourselves, let others care for you if possible, enjoy Christmas and hoping the New Year is a bright one

## Hot Topics Primary Care Nurse Live Webinar

**When: Thursday 4 February 2021 9.30-5.00**

Please view this [flier](#) detailing this one day course **which** has been funded by NHSE/I and is **free to attend** for nurses working in Primary Care.

The “Hot Topics” course consists of a series of short ‘TED-style’ engaging presentations blending evidence and cases, followed by discussion which may have an impact on your practice. The course comes with a number of extra resources.

Prior to the event your course reference book will be posted to your address. The book is fully referenced with recent summaries of the evidence for approximately 150 clinical Hot Topics commonly seen in primary care. All of the material is up to date and the material is completely 100% independent from any external influence. There is also 12 months access to the on-line electronic version of the book which is instantly searchable.

Please follow the link in the flier to book a place.

If you have any questions at all please contact call 0191 5197293 or email [hottopics@nbmedical.com](mailto:hottopics@nbmedical.com)
