

Advice on using ICE OpenNet to see patient results on other Trusts' systems

17/01/2020

Reports sent to your location can be viewed in your practice system in the normal manner; however ICE will also allow you to see hospital requested results. Depending on the system (EMIS or SystmOne) there are different ways to view reports on ICE but the following is common.

To view all results held on ICE for a patient:

1. Find the patient in your SystmOne / EMIS system in the normal manner
2. Go through the initial steps of making an Online Test Request
3. Select the Services downward facing triangle at the top left of the screen

Patient Name: Ms Minnie Mouse
 Date of Birth: 12 July 1966
 Address: The Castle, Magic Kingdom, Florida
 Services: **▼ Services**
 Please provide the following details regarding your request. One

4. Select either the **"Patient Report List"** or the **"OpenNet Patient Report"** option

ICE OpenNet is an add-on service we have purchased that can link to another specific ICE system, without the need for a separate login, where we have an inter-Trust data sharing agreement. We have such links with several other Trusts in the region.

The lookup service operates either using the OpenNet **button** on the *Patient Report list* page or directly from the *OpenNet Patient Report* page in ICE.

Status	Investigation	Requesting Clinician	Location	Sample Number	Sample Collected	Sample Received	Reported

Warning - this remote trust has no matching patients: Harrogate District Foundation Trust

No further attempts to communicate with this remote system will be made while viewing this screen. To re-attempt, exit this screen and try again.

If there is no current match you will be told, or if there is you must review and "Select" the offered match and you can then view the results.
