

Meet our Frailty Care Coordinator

Alice is a Frailty Care Coordinator who is passionate about supporting patients with varying severities of care and social needs. She loves helping people and has a keen interest in medicine. An appointment could help to:

- Have a single point of contact to call should any issues arise
- Ensure your care reflects your wishes
- Gain local health and wellbeing support
- Arrange vaccines and referrals to Age UK

Alice has made a great difference in the holistic support of people living with frailty and contributed to personalised care plans that enable a better quality of life for these patients.

- Dr Ruth Walker
