

Direct Access Leg Ulcer Clinical Assessment Services - York & Malton Hospitals

The new Direct Access Leg Ulcer Clinical Assessment Services at York and Malton Hospitals are now open. Please refer in via the RSS to Surgery Vascular/Leg Ulcer

These services are for patients who present with a new lower limb ulceration within 2-16 weeks from advent.

GPs are asked to please specify the date of onset and the site of the new leg ulcer, including relevant history of previous ulceration and lower limb vascular intervention on the referral.

Please note that due to clinic capacity, patients may be asked to attend York or Malton Hospital for their appointment.
