Quality in
the NHS

01

Whose job
is it to improve
patient care?

02

Using the
Model for
Improvement in
practice

04

How do you
improve patient
care?

03

The Improvement Academy's online entry-level **Bronze-level Quality Improvement training** is an introduction to quality improvement.

The four modules start with what we really mean by 'quality' and whose job it is to improve it. The Model for Improvement is introduced as a widely used tool and the module will take you through a practical example of using this in practice.

This is **FREE** to access and available for **ALL** healthcare providers and commissioners and anyone else who is interested in supporting or delivering quality improvement.

All modules end with a short quiz. On completion of **ALL** of the modules, a certificate of completion can be printed off. Complete the modules [here](#).

**Understand your role and how
you can contribute to
Quality Improvement in your
individual work area.**

**Complete
online in
45 mins!**
