

Recommendations from York and Scarborough Medicines Commissioning Committee September 2016

Drug name	Indication	Recommendation	Rationale for recommendation	Place in therapy	RAG status	Potential full year cost impact
Dulaglutide	Diabetes	Approved for	In comparison to	Recommended for formulary	Green	Cost neutral as
		formulary	exenatide ER, the	inclusion as the first choice weekly		marginally cheaper
		inclusion	licensed	preparation. Exenatide weekly		than exenatide
			indications for	preparation will remain on formulary		weekly
			dulaglutide are	as an alternative option		
			broader to include			
			use as			
			monotherapy and			
			in combination			
			with insulin.			
			Dulaglutide (unlike			
			exenatide ER) is			
			licensed for use			
			without dose			
			adjustment in			
			patients with			
			moderate renal			
			impairment.			
			Dulaglutide is			
			available via an			
			automated pen			
			device which may			
			benefit patients			
			and carers/nursing			

						onninssioning Group
			teams.			
Co-	All	Issue reminder to	Formulary	-	Restricted	-
danthramer/co-		prescribers that	currently highlights		product	
danthrusate		these products	impending
